

OXYGEN GENERATOR SYSTEM

OKSİJEN ÜRETİM SİSTEMLERİ

Oxy World Psa

Health Industries Technologies

OXY World PSA bir MEDİSAM kuruluşudur.

From 2004 to the present

In 2004, with the establishment of Medisam Health Systems by Abdussamet EVRENSEL, our company started to serve in the health sector.

In the light of the experience gained over the years, our company, which provides meticulous production of the developing and expanding product range, has gained a considerable place in the country and abroad.

MEDİSAM has launched OXY WORLD PSA as a sub-brand thanks to its increasing production volume and technological equipment.

High Quality Production

Diligence in all procedures

Safe and Fast Delivery

OXY World PSA has a wide range of products such as oxygen and nitrogen production systems, pendantes, patient bed heads, medical power plants.

Oxy World Psa
Health Industries Technologies

MEDİSAM

We have all the necessary standards to ensure that you never experience any problems while using our products.

As the OXY World PSA family, in the light of the motto **"continuous excellence",** it is an important part of our business to ensure the continuity of customer satisfaction not only until the purchase, but also after sales.

We know the importance of all the equipment in our product range for human life.

At every stage of our production, we fully implement all the procedures we have developed with the awareness of this importance and deliver our products after meticulously performing all necessary tests.

OXY World PSA has all the necessary certificates such as ISO-TSE-CE and is among the few companies that produce in accordance with European standards.

Our company works to keep customer satisfaction at the highest level with sales, after sales follow-up and technical support.

You can contact our support team 24/7.

All our communication channels are always active for your questions.

OXY WORLD PSA OXYGEN GENERATOR

PLC (Beckhoff)

Oxygen generators provide ease of use and control with specially designed Beckhoff PLC. Thanks to the remote access module, it can be intervened in case of any problem.

ZIRCONIA OXYGEN ANALYZER

Provides quality and accurate measurement. Long service life.

VIP VALF (OMAL)

It is an ATEX certified quality product that creates both a stop mechanism and a control mechanism in a single device for all purposes.

OXYGEN ANALYZER

Measures oxygen purity in the generator by making precise measurements.

PRESSURE TRANSMITTERS

It gives the most accurate information to the user by measuring the air pressure in the tanks.

AIR CONDITIONING

Used to adjust air flow rate and pressure.

DEBIMETER

Thanks to the flowmeter, the oxygen purity can be displayed on the PLC screen at the closest level to the actual value.

EMERGENCY STOP

It provides the user with visual and audible alarms according to the state of oxygen purity in the oxygen tank.

ZEOLITE

It decomposes the air coming from the oxygen generator into its elements to obtain high purity oxygen.

COMPLIANCE TO INTERNATIONAL STANDARDS

		ISO 7396-1	ABD USP XXII OXYGEN %93	EU PHARMACOPOEIA OXYGEN %93	OXY WORLD PSA
Oxygen	O_2	>90%	90% - 96%	90% - 96 %	90% - 96 %

BİLEŞENLER

COMPRESSOR

Compressor is the component that collects the air needed by the Medical Oxygen Production, Storage and Control System.

AIR DRYER

Air dryers are used to separate the water vapor in the air in the system.

AIR AND OXYGEN TANKS

An air tank is a pressurized vessel where air is accumulated (at 10 bar pressure) before being sent to the oxygen generator. These tanks are resistant up to 16 bar pressure.

Oxygen tank is the pressurized vessel where the medical gas produced in the oxygen generator is stored.

BİLEŞENLER

COMPRESSED AIR FILTER

Components used to filter particles and oil vapor in the air.
Effective in dust and oil retention.

ACTIVE CARBON TOWER

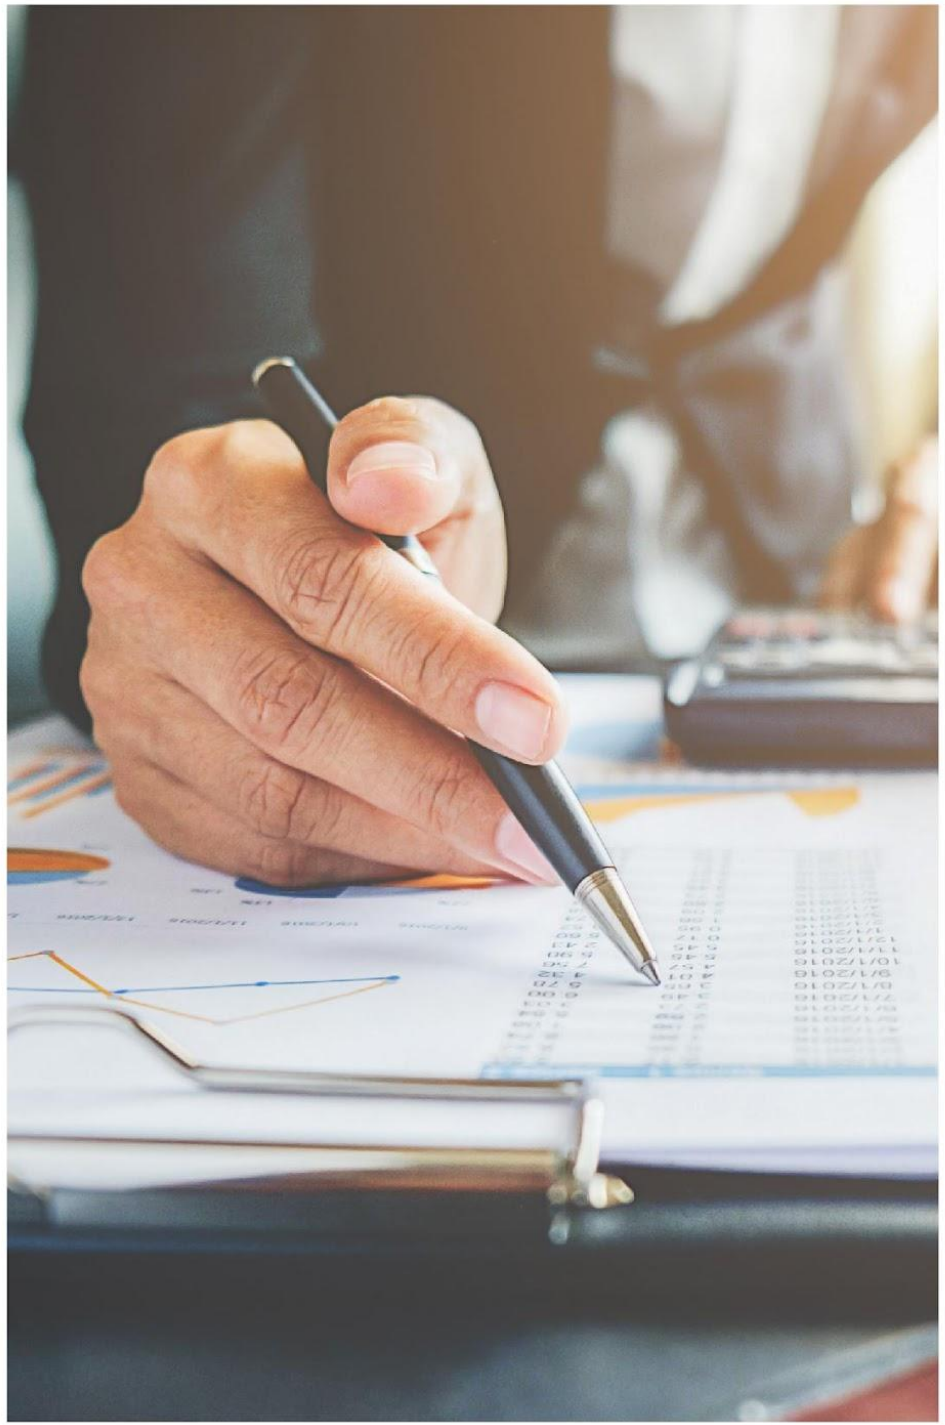

Used for filtering odor and oil vapor.

BOOSTER

It ensures that the high purity oxygen produced is filled into the cylinders.

1 ton liquid oxygen = 738 m³ gas oxygen

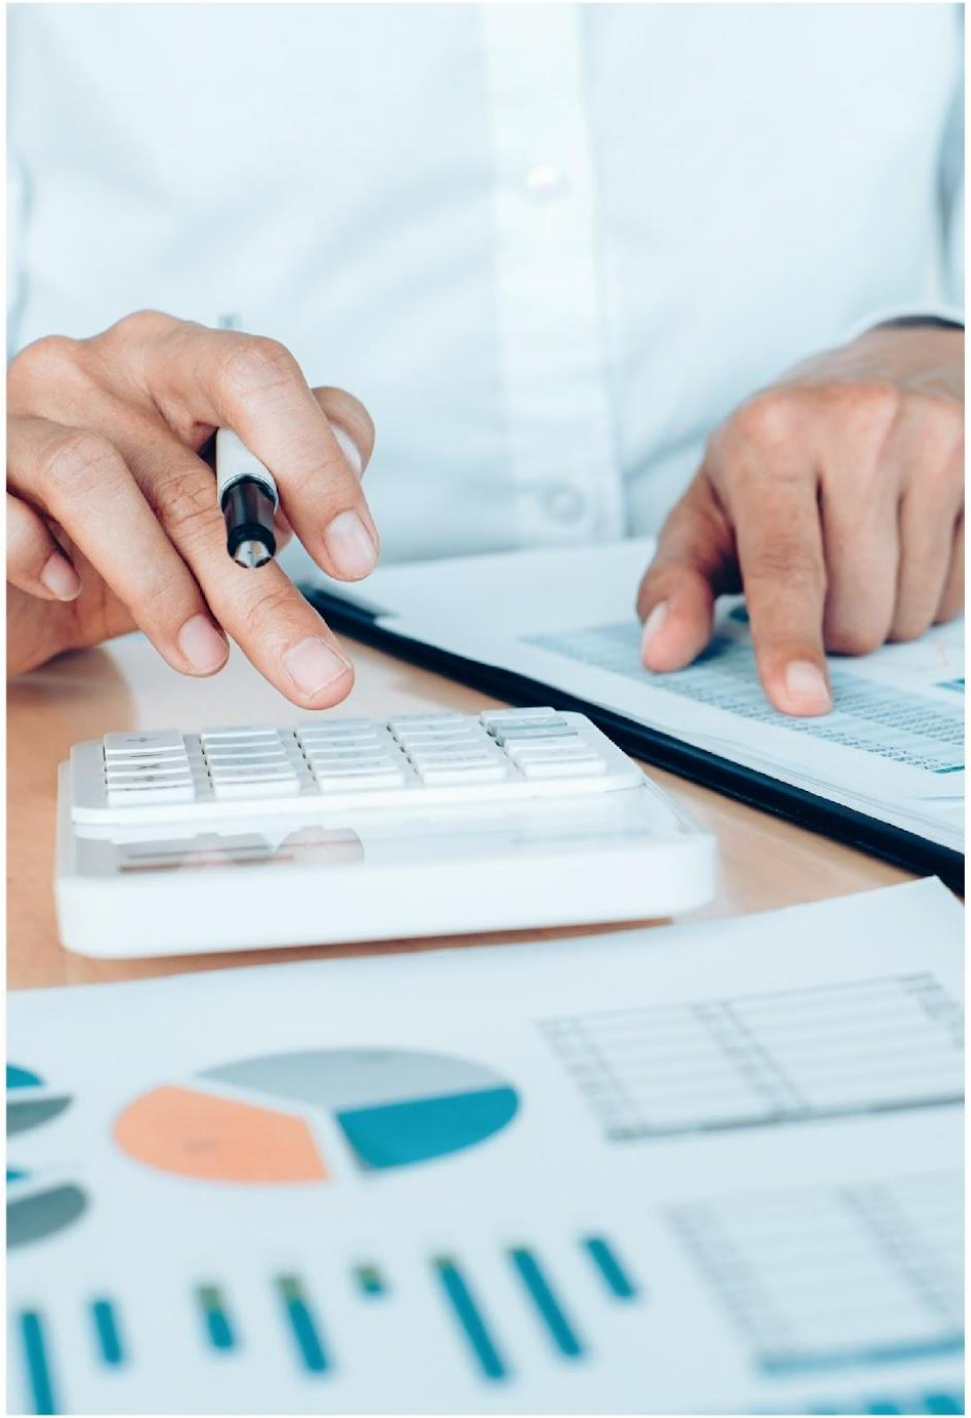

Let's hypothetically assume that a hospital consumes 1 ton of liquid oxygen in 1 day.

The purchase and supply cost of 1 ton of liquid oxygen is between 7.500 ₺ and 11.000 ₺, provided that it varies.

Based on 2022 data.

Oxy World Psa
Health Industries Technologies

MEDİSAM

The average is 9.250 ₺. (1 ton liquid oxygen usage cost)

OXY WORLD PSA OXYGEN GENERATORS will work for this production and consumes 140 kW of electricity in 1 hour.

If it is accepted that average 1 kW / hour = 3 ₺,

Our system produces 1 ton of liquid for approximately 2.583 ₺.

Thus, savings of up to 72% are achieved.

Based on 2022 data.

Oxy World Psa
Health Industries Technologies

MEDİSAM

WHEN YOU USE OXY WORLD PSA OXYGEN PRODUCTION SYSTEM

- Safety issues due to high pressure in the tubes
- Cylinder/liquid oxygen tank rent
- Transportation Cost
- Internal procurement expenses
- Labor costs and risks for tube unloading/loading and transportation
- 10-15% oxygen leaks in the liquid oxygen tank due to temperature and internal pressure
- You will not experience oxygen gas pressure fluctuations and similar problems during cylinder changes
