# About Taraji Energy Limited

- Taraji was registered in October 2021 with an initial focus on community development via agriculture and seeks to create sustainable and affordable community development. Making free energy and communication available to all.

- Taraji Energy Limited is a collaboration between a Kenyan organisation and a USA solar manufacturer with one common aim. To provide sustainable energy and storage with affordable communication using solar energy via some of the world's advanced patented technologies

By analyzing its strengths, addressing weaknesses, capitalizing on opportunities, andmitigating threats, Taraji Energy can develop effective strategies to enhance its market position, profitability, and sustainability in the energy sector.

# Taraji Energy Limited

**STRENGHTS**

1.Diverse Energy Portfolio: Taraji Energy may have a diverse portfolio of energy sources, including renewable energy (e.g., solar, wind) and conventional energy sources (e.g., natural gas, oil).

2.Strong Technological Expertise: The company might have a team of skilled engineers and technicians with expertise in energy production and distribution technologies.

3.Energy Efficiency Solutions: Taraji Energy could offer energy efficiency solutions to customers, helping them reduce energy consumption and costs.

4.Established Infrastructure: The company's existing infrastructure, such as power plants and distribution networks, can support its energy operations.

**WEAKNESSES**

1.Diverse Energy Portfolio: Taraji Energy may have a diverse portfolio of energy sources, including renewable energy (e.g., solar, wind) and conventional energy sources (e.g., natural gas, oil).

2.Strong Technological Expertise: The company might have a team of skilled engineers and technicians with expertise in energy production and distribution technologies.

3.Energy Efficiency Solutions: Taraji Energy could offer energy efficiency solutions to customers, helping them reduce energy consumption and costs.

4.Established Infrastructure: The company's existing infrastructure, such as power plants and distribution networks, can support its energy operations.

# Taraji Energy Limited

OPPORTUNITIES

1.Renewable Energy Growth: Expanding renewable energy capacity can align Taraji Energy with the global trend towards clean energy and attract environmentally-conscious customers.

2.Energy Storage Solutions: Investing in energy storage technologies can help the company manage energy supply-demand imbalances and offer value-added services to customers.

3.Government Incentives: Taking advantage of government incentives and subsidies for renewable energy projects can improve financial viability.

4.International Expansion: Exploring opportunities in international markets can diversify Taraji Energy's revenue streams and enhance its global presence.

THREATS

1.Competing Energy Providers: Taraji Energy may face competition from other energy providers, both conventional and renewable, impacting market share and pricing.

2.Changing Regulations: Evolving energy policies and regulations can affect the company's operations and financials.

3.Technological Disruptions: Rapid advancements in energy technologies may render certain solutions obsolete or less competitive.

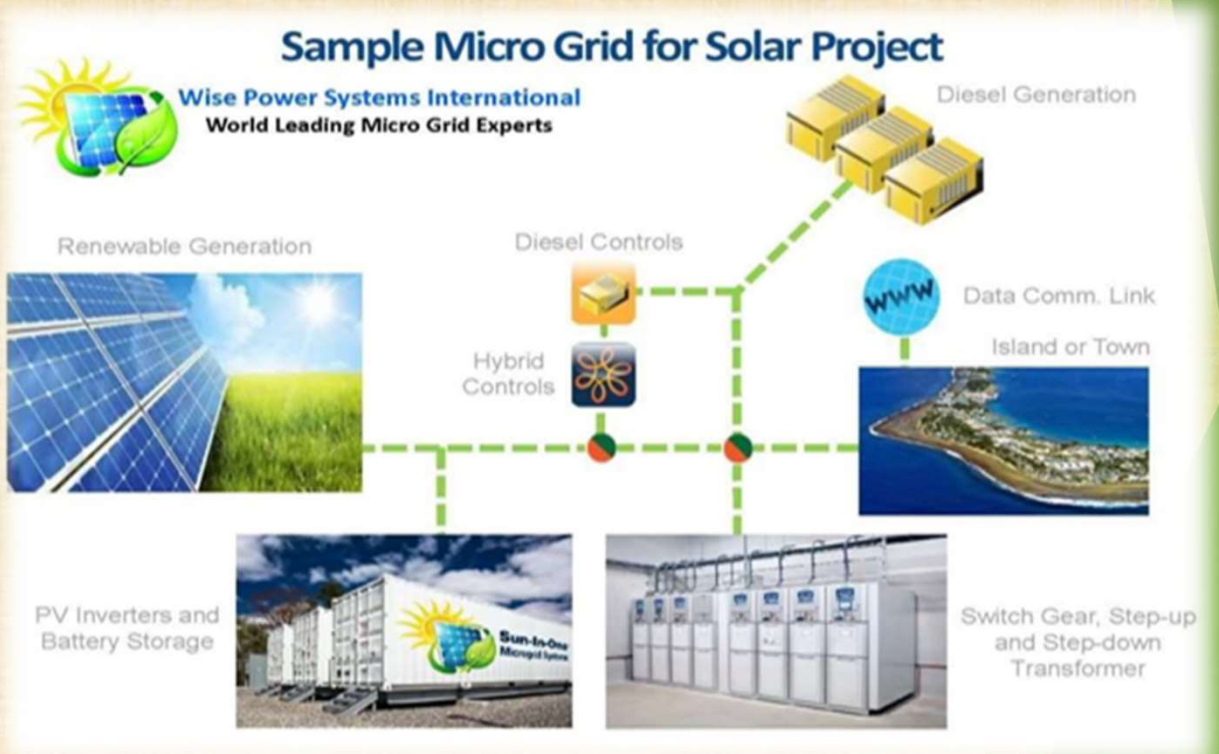

4.Environmental Concerns: Increasing public awareness of environmental issues may lead to greater scrutiny of the company's environmental practices.

# Taraji Energy Micro Grids

Taraji Energy offers Suninone's most advanced energy storage solution. Our Grid harnesses power from the sun which is stored in containerized batteries.

This grid can work independently or tie-in with the government's grid.

Built-in smart sensors send messages to the generator to engage prior to loss of power or low voltage.

# Taraji Energy Solar Wifi booster

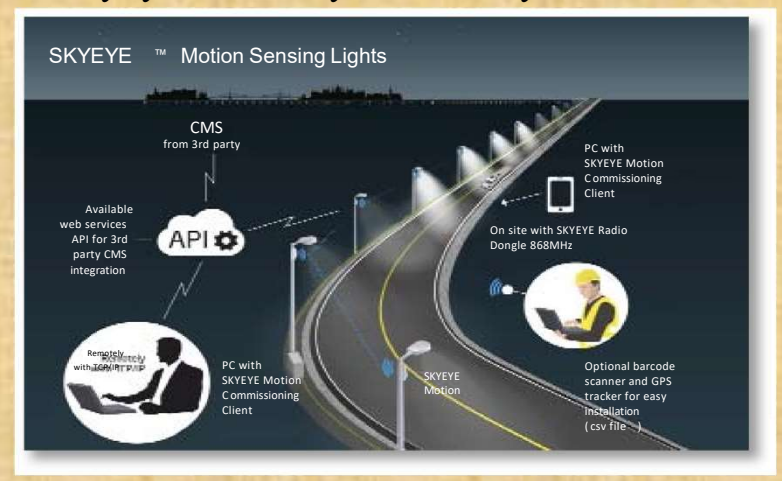

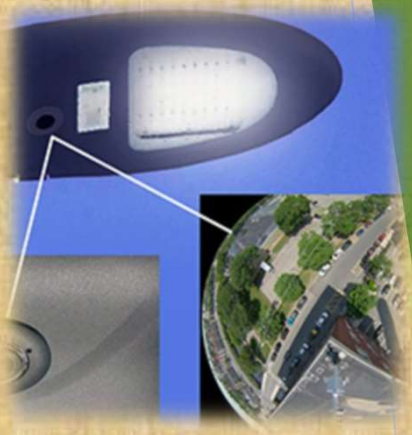

As the telecom and wireless industry grows, mobile network operators, tower companies, and wireless internet service providers are expanding infrastructure in remote areas with unreliable grid power or no grid power at all. The status quo solution for bad-grid and off-grid telecom infrastructure continues to be diesel generators, which come with high fuel and maintenance costs and carbon emissions. Suninone containerized solar micro-grids provide a clean, reliable, affordable alternative to diesel generators for the telecom industry.

# Taraji Energy Skye eye and Motion sensor lights and Cameras

SkyEye™ Security Camera Systems

SKYEYE™ LED STREET LIGHT SYSTEM

Wi-Fi, Public or Private

Security Camera with Analytics

Two Way Communication

Ability to Read License Plates

Motion Sensing Lights

Understand the Flow of Pedestrian and Automobile Traffic

# Taraji Energy Limited Water Heater

SWHs can be used at homes for producing hot water that can be used for bathing, cleaning, and washing. Solar water heaters (SWHs) of 100-300 litres capacity are suited for domestic application.

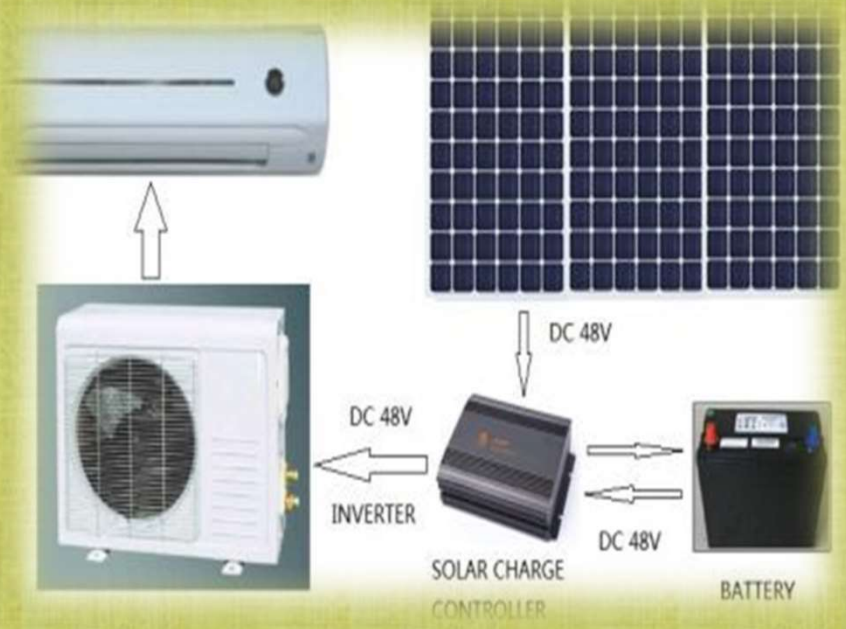

Fuel Savings: A 100 litres capacity SWH can replace an electric geyser for residential use and saves 1500 units of electricity annually.

Saves cost on power generation - The use of 1000 SWHs of 100 litres capacity each can contribute to a peak load saving of 1 MW.

Environmental benefits - A SWH of 100 litres capacity can prevent emission of 1.5 tonnes of carbon-dioxide per year.

Pay back period - SWHs have a life span of 15-20 years. The pay back period is about 3-4 years when electricity is replaced, 4-5 years when furnace oil is replaced and 6-7 years when coal is replaced.

# Taraji Energy Limited
# Solar AC Units

The benefits of using solar-powered air conditioner units include:

They are environmentally friendly.

They are easy to install.

They reduce your carbon footprint.

They are cheaper than traditional units.

They're cost-effective on your monthly electric bill.

They offer lower grid demand and load shifting during peak usage.

They reduce electricity costs.

They offer off-the-grid capabilities.

They reduce greenhouse gas emissions.

They have the ability to increase mobility in isolated regions.

They reduce dependence on electrical infrastructure.

They increase the energy economy.

**Founder and Director, Finance & Risk:**
**Profile of Noel Ikiara FCCA, CPA**

**Background**

Noel is an accounting and finance professional with over 13 years' experience in Africa and the United Kingdom, spanning various industries and sectors including financial services, consumer, industrial and public sector. His passion is to assist individuals, organisations and communities succeed in their pursuits including enabling clients solve complex accounting, finance and strategic matters.

Prior to forming Taraji Quest Limited in 2021, he worked in management consulting and banking, working for KPMG (East Africa and the United Kingdom) for over 11 years and Equity Group (East and Central Africa) for almost 3 years. He is a lecturer at the United States International University (USIU – Africa) teaching a professional accountancy course and the Lead Consultant at Hekima Infinity Limited. He is also the Finance Director of Xenum Group Africa Limited, a pharmaceutical company

**Director of Project Development**
**Sherry Seepersad**

## Background

A young adventurer with over 20 years sales & marketing experience, Sherry epitomizes cross-cultural people engagement.

She has travelled, lived in and worked across the Caribbean, Europe, Asia and Africa successfully leading revenue growth across the FMCG, Oil & Gas, Renewable Energy, Pharmaceuticals, and Hospitality.

She is passionate about human wellness and community development.
